Enjoy the natural light delivered by your MaxLight skylight and have full control of the light level to suit the mood and situation. With the MaxDim, the light level can be easily adjusted with the push of a button.

The choice is all yours. You can keep the MaxLight fully open to let in maximum natural light, close it off fully - or choose any light level in between.

MaxDim is an ideal add-on option for skylights installed in bedrooms, media rooms, classrooms, offices, and other situations where controlling the level of natural light is desirable.

#### Available in all MaxLight Sizes:

- 250mm
- 400mm
- 5500mm

#### MaxDim Advantages

**Solar powered – no running costs**

**Easy handyman installation - new or retrofit**

**Provision for hard wire and wall switch option**

**Control light levels - one remote operates multiple units**

**10-year solar panel warranty, 5-year motor warranty**

**Australian made, designed and owned**

#### How the MaxDim Works:

1. A roof mounted solar panel powers a 12V motor attached to the dimmer ring.
2. The motor moves the butterfly flaps in the dimmer up and down to control the amount of natural light passing through the tube.
3. The dimmer is operated with the remote control.
